Re: ELAC Physical Plant – 02E.6203.03 – Letter of Thanks
Letter #12

Dear Mr. Traverso:

I am writing to thank your firm, AMG & Associates, Inc., for the outstanding work you are currently providing at East Los Angeles College. AMG & Associates has been a pleasure to work with and have proven to be professional and efficient time and time again.

In the world of public works construction it is very rare to find a diamond in the rough firm who is awarded contracts; AMG & Associates, Inc. is one of these rare finds. Our firm, Jacobs Facilities, Inc., has been serving as the College Project Managers for the Campus for the past four years and AMG is the best contractor we have had to date, and possibly one of the best contractors I have ever worked with.

AMG has all of the right qualities to be the best and have kept all promises made at the beginning of the project. These promises are issues that are extremely important to any owner's representative: schedule reliability, budget compliance, and project safety. Many contractors promise to complete a project with no change orders and AMG has kept their promise, and their only change orders to date have been owner request. In addition to the many owner changes that they have dealt with, they have managed to maintain the projects critical path, and our original completion date has not wavered.

AMG Associates, Inc. has been working on what could possibly one of the most difficult projects on Campus. They are currently working right in the heart of the Campus Plant Facilities Department. Many of the Plant Facilities employees have been working on campus for 30+ years and have very strong opinions construction means and methods due to fact they are responsible for maintenance and operations. AMG Associates, Inc. has managed to respond to daily requests and recommendations, not only with grace, but has managed to gain respect and gratification from the Campus.

AMG Associates, Inc. has been a pleasure to work with and we hope our relationship is continuous. We are thankful they have just been awarded another project on this campus, and we look forward to the ongoing success.

Very truly yours,

Danielle Lyons
Project Controls Manager
