RE: ELAC R5a Relocation and N2 Modernization, Contract Number 31465
Project Numbers 02E-2.4-6227.05 and 02E-2.4-6277.07

Dear Mr. Traverso,

As the Architect of Record and on behalf of TDM Architects Inc. and the entire project team I would like to thank you for the work AMG & Associates did on the Physical Plant and R5a/N2 projects at East Los Angeles College.

AMG & Associates was instrumental in meeting some critical dates, specially, in completing the Presidents Office TI work. AMG executed the work on both projects in a safe, professional manner and delivered the project on-time and met the intended quality standard.

AMG & Associates appeared to have a good working relationship with their sub contractors and were able to establish an excellent relationship with the DSA inspector of record. Their cooperation with the College Facilities personnel and the Project Manager helped develop a smooth construction process. AMG & Associates executed the last minute changes to the contract without any hesitation.

I'd like to thank AMG & Associates for your partnership on these projects and I hope to work with your firm again on future projects.

Sincerely,

Diran Depanian AIA
TDM Architects Inc.
